Index of subjects

Acid, gibberellic, action of, in a maize mutant, 73
Acoustic microscopy of chromosomes, 193
Adipose tissue, 93
Argillans in soils, morphology, composition and genesis of, 353
Asbestos, crocidolite, defects in, 181
Autoradiographs, protection against loss of silver grains from, 117

Beam current, recording, for X-ray microscopy, 207

Cathodoluminescent study of quartz sand grains, 279
Cells, smooth muscle, dimensional changes of, 85
Chromosomes, metaphase, acoustic microscopy of, 193
Cine micrography, illumination system for 65
Clay soils, classification of microstructures of, 237
Computer simulations of electron microscope images on 35 mm film, 175
Computer technique, digital, to analyse micrographs of soil fabric, 303
Conjugate surfaces, study of pore space of solids, 363
Coverslip holder for CPD of cell cultures, 225
CPD of bladder tissue, 29
CPD of cell cultures, coverslip holder for, 225
Cryoprotectants, high molecular weight, effect of, 93
Cryo-ultramicrotome sections, method to obtain, 113
Crystals, homogeneous, simulation of interfaces in, 129

Dark field, low powered, fibre optic ring illumination system, 65
Diffractograms, device for direct recording of, 105
Dimensional changes of cultured cells, 85

Etching of a microcline perthite, 291

Fourier methods in characterization of microfabric and texture of sediments, 261

Glass knives, aid in evaluation of, 217

Halite in soils, SEM morphology of, 343
Histoenzymatic investigations, 43

Illumination system, a fibre optic ring, 65
Images, EM, computer simulation of, in 35 mm film, 175
Immunoglobulins, staining of, 201
Interfaces, inclined, TEM contrast simulation of, 129
Interferometry, application of, 43
Intermicroscopic correlative procedure for examination of muscle, 53

Kaolin, deformed, microfabric of, 329
Knives, glass, aid in evaluation of, 217

Lamellar microstructure, by optical diffraction, 137
Light microscopy, correlative procedure for, 53
Liposome suspensions, morphological characterization of 159
Liver, effects of cryoprotectants on, 93

Maize mutant, dwarf, action of gibberellic acid, 73
Microcline perthite, experimental etching of, 291
Microfabric of deformed kaolin, 329
Morphologies, SEM of halite in soils, 343
Morphology, surface, technique for examination of, 29
Muscle, mammalian, skeletal, 53
Muscle, smooth, dimensional changes in, 85
Mutant, dwarf maize, action of acid on, 73
Myofibrillar fine structure, 113

Optical diffraction: application to lamellar microstructures, 137
Optical image projection system, real-time, 121
Organans in soils, morphology, composition and genesis of, 353

Paraffin sections, aid to interpretation of immunoperoxide staining, 201
Particle number, estimation of, 15
Perthite, microcline, experimental etching of, 291
Photomicrography, illumination system for, 65
Pigments, organic, TEM of, 1
Pore space of soils, study of, by method of conjugate surfaces, 363
Protoplasts, preparation of fragile, 109
Pulse stretch method, X-ray mapping of two or more elements, 213

Quartz sand grains, study of, 279

Replicas, freeze-fracture, 159
Replicas, platinum–carbon, 29

Sand grains, quartz, cathodoluminescent study of, 279
Scanning electron microscopy, direct correlative procedure 53
use of, to characterize texture of sediments, 261

Pore space of soils, study of, by method of conjugate surfaces, 363
Protoplasts, preparation of fragile, 109
Pulse stretch method, X-ray mapping of two or more elements, 213

Quartz sand grains, study of, 279

Replicas, freeze-fracture, 159
Replicas, platinum–carbon, 29

Sand grains, quartz, cathodoluminescent study of, 279
Scanning electron microscopy, direct correlative procedure 53
use of, to characterize texture of sediments, 261

Scanning transmission electron microscopy, recording transmitted beam current, 207
Sediments, texture of, 261
Silver grains, loss of, method to protect from, 117
Soil fabric, digital computer technique to analyse micrographs of, 303
Soils, clay, classification of microstructures of, 237
Soil structure, quantification of, 317
Stain precipitate, method to remove, 221
Surfaces, conjugate, study of pore space of solids, 363
Suspensions, liposome, characterization of, 159

Transmission electron microscopy of organic pigments, 1
contrast simulation of interfaces in crystals, 129
dimensional changes of cells, 85
direct correlative procedure, 53

Ultrastucture effects of cryoprotectants, 93

Video micrography, illumination system for, 65

Weathering, natural, experimental etching of a microcline perthite, 291

X-ray mapping, discriminatory, by a pulse stretch method, 213
X-ray microanalysis, recording transmission beam current for, 207
X-ray microanalysis study of acid on a maize mutant, 73
